Can be punched on both sides

Surface working is necessary

Planing of worn surfaces (which increases the service life of the punching tools) is possible

If desired, different Shore hardnesses can be supplied

Precise cut and less wear on the punching tools

Dimensions:

Basically all sizes up to the size of 2000 x 1200 mm in thickness 8–100 mm and all sizes within 1000 x 1000 mm in thickness 110–160 mm. Other dimensions and thicknesses upon request.

Surface:

The standard surface up to the breadth of 1000 mm is planed – 0/+ 0,6 mm. From the breadth of 1000 mm the boards are unplanned.

Technical data:

Shore Factor (hardness +/- 2)	DIN 53505	D 84
Density	DIN 53479	1,15
Brussels Customs Tariff Number		3920 9200
